Frequently asked questions

What is Apple Pay?

Apple Pay lets you pay for purchases with your iPhone 6/6s or iPhone 6/6s Plus by holding your phone near a contactless reader. You can also use your iPad Air 2 and iPad mini 3 to pay for purchases in participating apps.

What do I need to get started with Apple Pay?

To use Apple Pay, you'll need the following:
• iPhone 6/6s or iPhone 6/6s Plus to pay in stores and within apps
• iPad Air 2 or iPad mini 3 to pay within apps
• iOS 9.0 or later
• Touch ID or passcode on your device
• iCloud® account

Are my payments safe with Apple Pay?

Yes. Apple Pay doesn't store your WV Central CU debit card number on your phone or give it to the merchant. A unique digital code is created specifically for that device.

When I add my WV Central CU debit card to Apple Pay, will it look exactly like the card in my wallet?

Apple Pay uses a graphical representation of your WV Central CU debit card and in some cases it will not look exactly like the card in your wallet. If not, we've created a blue/grey card to represent your WV Central CU debit card.

How do I change my default card to my WV Central CU debit card?

The credit or debit card associated with your iTunes® account or the first card you add to the Wallet app is your default card. To change your default card:
1. Go to Settings > Wallet & Apple Pay
2. Tap Default Card
3. Choose a new card

Which merchants are participating?

You can use Apple Pay at hundreds of thousands of stores, including Panera Bread®, McDonald's®, Macy's®, Nike®, Office Depot®, ToysRUs® and the Tamarack. Review a complete list of Apple Pay merchants at apple.com/apple-pay/where-to-use-apple-pay.
